

Abstract

Sustainable Development in Bangladesh: Problem and Prospects

Mohammad Abul Kalam Azad
Senior Lecturer
Manarat International University, MIU

Bangladesh is the most densely populated countries of the world with a population of 155 million a land mass of 147,750 sq.kms. Bangla is the state language and citizens are known as Bangladeshi. In Article 18 A : Protection & Improvement of Environment and Biodiversity; in the Constitution of the People's Republic of Bangladesh states that, "The state shall endeavor to protect and improve the environment and to preserve and safeguard the natural resources, biodiversity, wetlands, forest and wildlife for the present and future citizens". The pursuit of sustainable development is, therefore, a Constitutional obligation in Bangladesh. Sustainable Development addresses economic, social and environmental issues which are all addressed by the Bangladesh government. In some extend country become successful and somewhere it facing extreme problems. In my paper I will try to discuss those issues.
