

☞ The exquisite shady walks lead you past flowering fields, dovecotes, palm groves and stables.
This is the ideal opportunity to witness how modern farming has developed since centuries before, when agriculture started with flood irrigation, with farmers caring for their fields and herding their sheep.
Now, at SEKEM, there is much to see and to discover. A guided tour around the farm will give you insight into the development, facilitated by SEKEM's economic life and cultural activities.

☞ There is much to discover: the production facilities of the SEKEM companies, the agricultural activities and cattle, the Medical Center or the different kinds of schools.

The SEKEM Farm is situated roughly 60km north east of Cairo.

... this is the way to the SEKEM Farm!
